

Diesel prices almost doubled during the last year.

N, P, and K prices almost tripled during the last year.

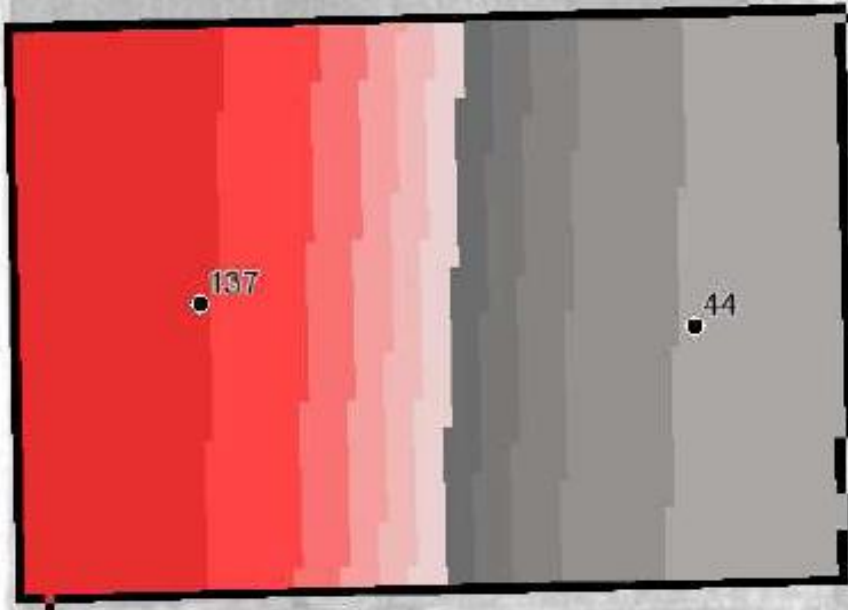

At the onset of the recent financial crisis
crop prices plummeted while
diesel and fertilizer prices have been
reduced to a much lesser degree.

Smart Sampling

- Smart sampling is a method of directing samples in a pre-determined manner .
- Sample site locations can be chosen based upon several criteria.
- Known areas of low yield, high yield, poor drainage or soil texture can be chosen.
- Veris zone maps, aerial imagery, yield maps, and grid soil sample maps can also be used to determine sample locations.
