EFS® SYSTEM

The EFS® cotton management system is a group of related software programs designed to work independently and cooperatively to manage cotton as a raw material and asset. By providing tools to manage most aspects of cotton’s life cycle, the cotton management system seeks to improve the efficiency of cotton flow, augment the efficiency and utility of cotton, increase cotton’s profitability, and enhance the demand for cotton.

EFS®-USCROP™ AND USCROP™ Web Software

EFS®-USCROP™ software enables a user to review and analyze crop data using USDA HVI® classing information. Complicated sets of cotton classing data can be simplified and enhanced with a variety of reports and graphs. USCROP™ Web software is available as an online version. EFS®-USCROP™ and USCROP™ Web also have a feature for viewing the locations of U.S. Gins, USDA Classing Offices, and U.S. Cotton Warehouses on a map.

MILLNet™ Software

MILLNet™ software manages a mill’s acquisition and use of USDA HVI® classed cotton. Its groups and categories system can aid mills in creating uniform mixes best suited for a specified end product.
