Memphis Marriott East, Memphis, Tennessee

October 31, 2006

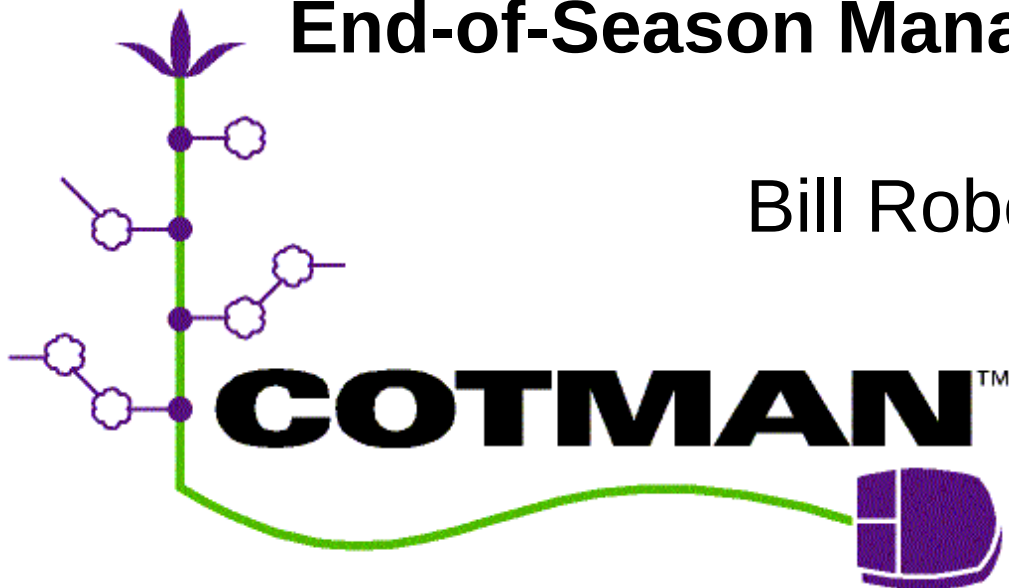

1:00 pm – 5:30 pm

COTMAN

End-of-Season Management Decisions

Bill Robertson

End-of-Season Management Decisions

- Establish Cutout
Define the last effective boll population
- Accumulate Heat Units beyond cutout
$$\left(\frac{\text{High Temp} + \text{Low Temp}}{2} \right) - 60 = \text{DD60s or Heat Units}$$
- Utilize these guidelines as tools to best develop your end-of-season management strategies
